Capso CAM PLUS

Risk Assessment Patient Questionnaire

Before performing remote (at-home) administration of the capsule, providers must ensure the patient is not at risk for capsule aspiration and/or choking. During a telehealth visit, please review this questionnaire with the patient. **If the patient answers "YES" to any of the following questions, the patient should NOT receive remote administration of the capsule.** Additionally, to further assess if a patient may experience difficulties swallowing the capsule, you may choose to review current and past medicine that the patient has taken in a pill form to compare pill size to capsule size. The CapsoCam Plus capsule endoscope is 11mm (diameter) x 31mm (length).

1. Does the patient have any physical or cognitive disabilities? ☐ YES ☐ NO
2. Is the patient younger than the age of 22 OR older than the age of 75? ☐ YES ☐ NO
3. Does the patient have the following risk factors for aspiration?
   - History of dysphagia (i.e. swallowing difficulties, especially large pills) ☐ YES ☐ NO
   - Difficulties chewing food ☐ YES ☐ NO
   - History of unexplained coughing, wheezing or choking (especially after eating) ☐ YES ☐ NO
   - Lower level of consciousness ☐ YES ☐ NO
   - Chronic respiratory conditions ☐ YES ☐ NO
4. Has the patient been diagnosed with pneumonia IN THE PAST YEAR ☐ YES ☐ NO

5. Has the patient EVER been diagnosed with aspiration pneumonia? ☐ YES ☐ NO
6. Does the patient have difficulty getting into sitting position independently? ☐ YES ☐ NO
7. Does the patient mix medicine with food or drinks to make it easier to swallow? ☐ YES ☐ NO
8. Does the patient break or crush tablets or open capsules to make it easier to swallow? ☐ YES ☐ NO
9. Does the patient have anxiety swallowing large vitamins/pills? ☐ YES ☐ NO
10. Does the patient have a history of or currently suffer from any of the following?
    - Coronary Artery Disease ☐ YES ☐ NO
    - Heart failure ☐ YES ☐ NO
    - Valve (mitral or aortic) repair ☐ YES ☐ NO
    - Neurological disease (such as Parkinson's dementia or development delay) ☐ YES ☐ NO
    - Atrial fibrillation ☐ YES ☐ NO
    - GI Surgery ☐ YES ☐ NO
    - Cerebrovascular accident/stroke ☐ YES ☐ NO
    - Ankylosing spondylitis ☐ YES ☐ NO
    - COPD (Chronical Obstructive Pulmonary Disease) ☐ YES ☐ NO
